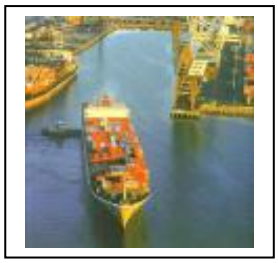
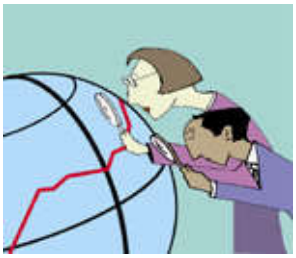
Study Guide
MGT. 205A





Daniel J.B. Mitchell
Ho-su Wu Professor
Anderson Graduate School of Management
and
School of Public Policy and Social Research

© 2007 Daniel J.B. Mitchell

This Study Guide is intended as a supplement to the course; it is not a textbook. Enrolled students in Management 205A are free to reproduce the Study Guide for their own use. Other persons who wish to make use of this Study Guide should request permission from Prof. Mitchell: 310-825-1504, <daniel.j.b.mitchell@anderson.ucla.edu>. Enrolled students will also be receiving electronic copies of PowerPoint slides used in class on a weekly basis after the class. The Study Guide was migrated from a paper to an electronic version several years ago. Scanning was used to move the text. Although an effort was made to correct resulting typographical errors, some may remain. Other errors may have crept in during subsequent revisions. Please report any corrections you find to Prof. Mitchell. Thank you.

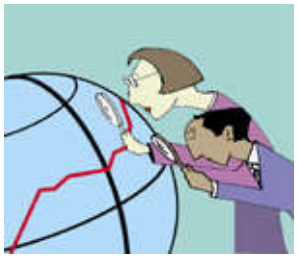


TABLE OF CONTENTS

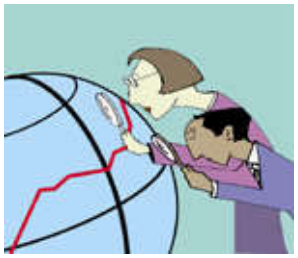
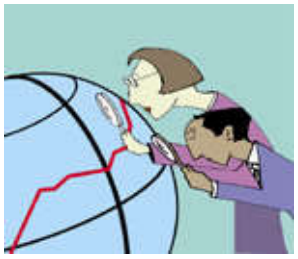
Main Text

10.1 The Ricardian Model of International Trade
10.11 The Terms of Trade as a Welfare Index
10.12 International Trade Example
11.1 A Special Case of No Advantage to Trade
11.2 Transactions Costs, Quality, and Trade
11.4 Does "Competitiveness" Have a Meaning at the National Level?
12.1 A Shift in Tastes
13.1 The Size of Countries
13.2 Productivity, Growth, and Benefits
14.1 A Departure from Free Trade
15.1 Exchange Rates: A Preliminary Look Based on the Ricardian Example
16.1 Relationship Between Unit Labor Costs and Pattern of Trade
17.1 Other Benefits from Trade?
18.1 Sample Midterm Questions: Ricardian Model
19.1 Is "Everyone" Better Off Under Ricardian Trade?
20.1 Production Functions
20.3 Summary of Assumptions
20.4 Version 1
20.5 Version 2
20.8 The Production-Possibilities Curve in the Two-Factor Case
20.16 Two-Factor Example
20.20 A Side Observation on Efficient Production (For Advanced Students)
21.1 Exports and Imports in the Two-Factor Model
25.1 A Note of Caution on the Demand Side
28.1 Is There Comparative Advantage in the Two-Factor Case?
30.1 Pattern (Structure) of Trade
35.1 Factor-Price Equalization
36.1 Final Thoughts on Heckscher-Ohlin, Comparative Advantage and All That
37.1 Sample Midterm Question: Two-Factor Model
40.1 The Gains from Trade: General Equilibrium
40.2 The Gains from Trade: Partial Equilibrium
50.1 Partial Equilibrium Analysis and Tariffs
51.1 Partial Substitutes and Trade
52.1 Tariff Losses Relative to GDP
60.1 Infant-Industry Tariffs
70.1 Terms-of-Trade Effect
71.1 A Special Form of the Terms of Trade Effect
75.1 A Tariff to Save Jobs



80.1 Effective vs. Nominal Tariffs
81.1 "Average" Tariffs
85.1 Dumping
90.1 Quotas
90.7 Non-Tariff Barriers (NTBs)
91.1 Would Auctioning Off a Quota Raise Money for the Government?
100.1 Customs Unions, Free-Trade Areas, and Related Arrangements
101.1 Strategic Trade Policy
102.1 Outline of U.S. Tariff/Trade History
105.1 Sample Midterm Question Using Demand-Supply Analysis
106.1 Sample Quantitative Midterm Question
107.1 Sample Mu1tiple-Choice Questions from a Midterm Exam
108.1 Lessons from the First Half of the Course
109.1 A Few Macro Concepts
110.1 Changes in Exchange Rates
110.5 Sources of Demand and Supply for Currencies
110.7 Derivation of Net Demand and Supply Curves
110.8 Devaluation as Seen in Terms of Our Currency (The Dollar)
110.11 The Shifting Curves Once Again (Simple Puzzlement)
110.12 The Shifting Curves Once Again (Sophisticated Puzzlement)
110.13 Exchange Rate Changes in Noncompetitive Cases
111.1 The J-Curve Effect
112.1 Trade vs. Finance in Determining Exchange Rates
115.1 The Terms of Trade and Devaluation
116.1 The Purchasing-Power-Parity (PPP) Doctrines
116.1 The Absolute PPP Doctrine
116.3 The Relative PPP Doctrine
117.1 A Purchasing Power Parity Question
120.1 Price-Specie-Flow Mechanism (A Simplified Gold Standard)
120.3 Exporting Inflation
122.1 A Modern Fixed Exchange Rate System
129.1 Shifting from Classical Micro Analysis to Macroeconomic Analysis
130.1 "Fix-Price" or Income Analysis of International Trade
130.2 Behavioral Assumptions
130.5 Numerical Example
130.6 Sample National Income Problem
130.7 Monetary and Fiscal Policy
135.1 Protection of Imports and its Effects on Exports
137.1 Coordination of Various Policies to Achieve Internal and External Equilibrium
139.1 The Foreign Exchange Market
140.1 Forward Market
141.1 Test Your Knowledge



150.1 Conventions of Balance-of-Payments Accounting
160.1 Examples of Balance-of-Payments Problems
168.1 A Brief History of the International Monetary System
170.1 International Monetary History: Summary
170.3 Options for the World Monetary System
171.1 A Note on Switching to a Common Currency
175.1 Sample Final Exam Essay Question
180.1 Lessons from the Second Half of the Course

Appendices

A10.1 Details of the Ricardian Numerical Example
A11.1 Details of the Impact of a Taste Shift on the Ricardian Example
A12.1 Details on the Impact of Size on the Terms of Trade
A13.1 Changing Averages in the Same Direction
A14.1 Real Wages, Relative Prices, and Production Decisions in the Two-Factor Model
A15.1 Relative Factor Abundance and the Shape of the Production-Possibilities Curve
A16.1 An Example of the Use of Cost-Benefit Analysis: Oil Price Controls
A17.1 Cost-Benefit Analysis of a Monopoly/Quota
A18.1 The Marshall-Lerner Elasticity Condition
A19.1 Answer to Purchasing Power Parity Question
A20.1 The IS-LM-FE Model
A20.3 The LM Curve
A20.5 Domestic Dynamics
A20.7 The FE Curve
A20.11 The "Assignment" Problem
A30.1 The IS-LM-FE Model Continued
A30.3 Changes in Exchange Rates
A35.1 Answer to Ricardian Midterm Question
A36.1 Answer to Two-Factor Midterm Question
A37.1 Answer to Demand/Supply Midterm Question
A38.1 Answer to Quantitative Midterm Question
A40.1 Answers to Balance-of-Payments Problem #1
A40.2 Answers to Balance-of-Payments Problem #2
A40.3 Answers to Balance-of-Payments Problem #3
A41.1 Leontief's Technique of Input-Output Analysis
A42.1 Hints on Sample Essay Question
A50.1 Phrases for the First Half of the Course
A60.1 Phrases for the Second Half of the Course
